DETAILED ACTION

An amendment of 2/26/08 amended claims 31, 33, 36, 39 and 41, and added new claim 43.

Claims examined on the merits are 31-43, which are all claims in the application.

5 An Information Disclosure Statement (IDS) filed 1/14/08 requested consideration of documents on an attached European Search Report. The documents have not been considered since the European Search Report was not attached, and the IDS did not contain form PTO-1449 listing the documents.

Claim Rejections - 35 USC § 112

10 The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

15 Claims 31-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In steps e) and f), claim 31 is unclear as to which previous step contains "said seeded support matrix". In line 3 of step d) and line 1 of step e), it is suggested --- from step c) --- be inserted after "matrix".

20 In line 10, claim 33 is unclear as to meaning of "thiol cross-linked with methylated collagen". Thiol is a group and not a material, and it is not seen how thiol alone can be cross-linked. Additionally, the claim is unclear in lines 9-10 whether the 4-armed polyethylene glycol is to be derivatized with both the succinimidyl ester and the thiol cross-linked with methylated collagen at the same time or alternatively, or the thiol cross-linked with methylated collagen is a
25 separate member of the Markush group. It is suggested "thiol cross-linked with methylated collagen" be deleted unless its meaning and relationship to the 4-armed polyethylene glycol can

be made clear. In line 9 and prior to line 9, different members of the group are separated by semicolons, whereas after line 9 different members are separated by commas. This confuses which members of the group that are separate members.

In lines 2-3 of claim 34, which is dependent on claim 33, "derivatized polyethylene glycol cross-linked with alkylated collagen wherein the alkylated collagen is methylated collagen" is confusing since claim 33 has been amended to recite "derivatized polyethylene glycol cross-linked with methylated collagen". In line 3, it is suggested "alkylated collagen wherein the alkylated collagen is" be deleted.

Claim 43 is unclear whether "said pressure" in line 1 is the "constant" pressure or the "cyclic hydrostatic pressure" in claim 31. It is suggested --- cyclic hydrostatic --- be inserted after "said" in line 1.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
